THRIVE

Thrive provides outsourced data services by training a local workforce in sustainable IT careers, helping families and companies succeed in the surrounding community.

A Local Problem

👤 👤 👤 👤

1 in 4 Cincinnatians falls below the poverty line

Cincinnati's poverty rate is almost twice the US average. Families face barriers to stable employment, housing, education, and transportation.

## CREATE LASTING IMPACT WITH US

A Local Solution

Thrive taps into a talent pool of individuals from low-employment areas and connects them to entry level careers in IT. By partnering with Per Scholas, a national nonprofit for free, quality education, Thrive is offering an in-depth 8-week training program in quality assurance software testing.

Service Offerings

Thrive is seeking skilled technology professionals who are passionate about making a difference in the community. Employees will work in an environment promoting individual growth and development, with competitive compensation and

Quality Assurance

- Functional Testing
- Regression Testing
- Usability Testing

Data Transformation

- ETL Database Tool
- Data & Report Migration
- Conversion

"Working with new QA Analysts is a satisfying challenge. They are driven and committed to getting themselves out of their previous situations. I am happy to be a part of this movement – I pray it will launch the analysts' careers in IT and provide another option for local employers looking for onsite QA resources."
Kokhon Chan, Senior QA Analyst
